Silent Performer / Powerforce (Lucita)

Disassembling process

First step is to remove the lid in the way you can see it in the picture.
When moving out the motor filter holder pay attention to the cutting out – it can be important when assemble the device.
To remove the handle follow the next steps with the help of a screwdriver:
Screwdriver also needed for dismantling the display.
Ease off the pedals on both sides with the help of a screwdriver.
Remove three screws:
Then dispart the lid from the bottom.
Remove the screws to dispart the motor housing.
Disconnect the PCB wirings then dispart the housing.
After these moves the cord winder and the motor are easily removeable.
When assemble the product pay attention to the knob direction:
