BALANCE A1 LIGHTWEIGHT CORDLESS VACUUM

SEBO MADE IN GERMANY www.sebo.us

SEBO BALANCE A1 Cordless

The new SEBO BALANCE A1 heralds a new era: A convenient cordless, battery-powered vacuum cleaner for all floors and surfaces that combines SEBO's decades of experience with state-of-the-art technology. Optimized by German engineering, the SEBO BALANCE A1 is equipped with a comprehensive package of tools, that includes a charging and accessory station, with a convenient selection of accessories, as shown below. Ergonomic, lightweight and versatile, it is the ideal everyday cleaning tool for your home. Available in three colors: gray, blue, and magenta.

Accessory Station

Lightweight – Weighing just five pounds, the SEBO BALANCE A1 is a real lightweight. Whether on floors, stairs, or hard-to-reach areas, the ultra-lightweight design ensures effortless cleaning and maximum convenience in every application. Cleaning has never been so easy!

Powerful Suction – The battery, together with the digital brushless motor with more than 100,000 rpm, ensures efficient and effective cleaning. There are three power-level options.

Battery Life – Its battery can operate uninterrupted for 48 minutes at Power-level One or up to 20 minutes at Power-level Three . . . enough to thoroughly clean most homes with maximum flexibility and efficiency.

Intuitive Handling with LED Display – The LED display shows the battery charge level precisely as a percentage and enables easy adjustment of the power level using the integrated buttons. The selected level is clearly displayed in a bar graph.

Quiet Operation – With a noise level of just 70 dB at Power-level One, the SEBO BALANCE A1 operates so quietly that it hardly disturbs your surroundings . . . ideal for households with children, pets, or sensitive ears.

Low-Profile, Swivel-Head Design – Featuring a swivel neck and flat-to-the-floor design, the SEBO Balance A1 makes it easy to maneuver around furniture and reach under low spaces. The flexible neck and low-profile body allow the power brush to glide smoothly beneath beds, sofas, and cabinets for complete floor coverage.

Soft-start Switch – The vacuum's gradual power-up capability extends motor life.

High-quality Microfiltration – The SEBO BALANCE A1 is equipped with a multi-stage filtration system to ensure maximum air purification. The first stage is the main cyclone that acts as a coarse separator. The second stage is equipped with six downstream mini-cyclones that filter out fine particles. Finally, the air passes through the third and fourth stages of the motor protection filter and the micro-hygiene filter, which extract the finest particles. The purified air is then released back into the room cleaner than before.

Automatic Shut-off – If an obstruction jams the brush roller or a clog develops, the machine automatically shuts off to prevent overheating and damage.

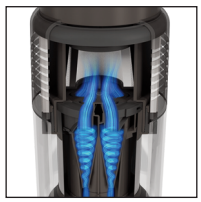

Powerful Electric Brush – If aggressive surface agitation is needed, the A1 offers an electric brush with an LED headlamp, and shock protection.

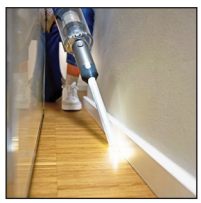

Lithium-ion Battery – The SEBO Balance A1 is powered by a high-performance lithium-ion battery that delivers up to 48 minutes of continuous cleaning. It recharges quickly and efficiently, providing cordless convenience and consistent power for every cleaning task.

7-Cyclone Technology – The cyclone technology and multi-stage filtration system deliver powerful, consistent suction while ensuring exceptionally clean exhaust air. A primary cyclone separates coarse debris, followed by six mini-cyclones, an advanced motor protection, and a micro-hygiene filter that capture fine dust and allergens - leaving your home cleaner and the air noticeably fresher.

LED Crevice Nozzle – The LED crevice nozzle is a slim, precision nozzle equipped with a built-in LED light that illuminates dark, narrow spaces for thorough cleaning in hard-to-reach areas. Its sleek design allows you to easily remove dust and debris from tight corners, between furniture, and along baseboards with exceptional visibility and accuracy.

Extension Hose – The extension hose makes it easy to clean hard-to-reach areas like stairs, corners, and upholstery without moving the main unit. Compatible with all A1 accessories, it offers added reach and flexibility while maintaining powerful, consistent suction.

Dusting and Upholstery Nozzle – The dusting and upholstery nozzle is a versatile 2-in-1 attachment designed for cleaning furniture, car interiors, and other fabric surfaces with ease. By sliding the bristles forward or back, it quickly transforms from a gentle dusting brush to an effective upholstery tool, ensuring thorough yet delicate cleaning on every surface.

Charging and Accessory Stand – The charging and accessory stand keeps your SEBO Balance A1 and all its attachments neatly organized and ready to use. Designed for convenience, it allows for easy storage, quick access to tools, and quick charging between cleans. For added flexibility, the unit can also be mounted to the wall, providing a space-saving storage option that fits into any home.

Servicing Your BALANCE A1 – Enter the link below to watch videos of how to empty the dust container, how to change a brush roller, and how to change the filters.
